

KABILESH K

PROFESSIONAL SUMMARY

A Computer Science Engineering Student passionate about Artificial Intelligence and Software Development. Skilled in Java, NLP, and Generative AI with hands-on experience in developing AI assistants and blockchain-based applications. Eager to apply technical skills and contribute to innovative real-world projects.

EDUCATION

B.E. Computer Science and Engineering
V.S.B Engineering College, Karur 2023 –
2027 CGPA: 7.30 (Till VI semester)

HSC

Veveaham Matric Hr.Sec School-2023
Percentage: 68.33%

SSLC

Veveaham Matric Hr.Sec School-2021
Percentage: Pass

PROJECTS

• NOVA AI – Intelligent Assistant

GitHub:<https://github.com/KABI1212/NOVA-AI.git>

WebLink:<https://nova-ai-virid-three.vercel.app/>

Developed an AI-powered assistant integrating multiple AI providers for automated response generation and task handling.

Tech: Python,Generative AI, Prompt Engineering

• Nexa AI – Career Guidance System

GitHub:<https://github.com/KABI1212/NEXA-AI.git>

AI-based system providing personalized career recommendations based on user input.

Tech: Python,JavaScript, SQL, Machine Learning

• Blockchain and Cybersecurity: Securechain (Team Project)

GitHub:<https://github.com/KABI1212/Blockchain-and-Cybersecurity-SecureChain.git>

Blockchain-based cybersecurity system providing secure transactions, decentralized authentication, and intelligent threat detection.

Tech: Python, Blockchain, Cryptography, Cybersecurity, AI

• ImpactSense – Earthquake Impact Prediction (Infosys Project)

GitHub:<https://github.com/KABI1212/ImpactSense---Earthquake-Impact-Prediction-.git>

AI-based earthquake impact prediction system developed under an Infosys project using machine learning and seismic data analysis.

Tech: Python, Machine Learning, Data Analysis

SKILLS

- Programming:Java, SQL
- Database: MySQL,MongoDB
- Web Technologies: HTML, CSS, JavaScript
- AI/ML: NLP,Generative AI, Prompt Engineering
- Tools: Git, GitHub, VS Code

SOFT SKILLS

- Problem Solving
- Time Management
- Teamwork
- Adaptability
- Communication

ACHIEVEMENTS

- Developed 5+ AI and software development projects and successfully deployed 1 production-ready web application
- Solved 100+ coding problems in Java
- Earned 10+ certifications in Artificial Intelligence, Cloud, and Software Development

INTERNSHIPS

- Let's Gametech – Learned the fundamentals of web development using HTML, CSS, and JavaScript.
- Pumo Technovation – Gained hands-on experience implementing frontend development concepts in real-world projects.
- Certify – Learned SQL fundamentals, including database queries and data management.
- Infosys Springboard – Virtual Internship 6.0 (Batch B-13) (2026)- Strengthened software development and problem-solving skills through project-based learning.

CERTIFICATIONS

- GenerativeAI Fluency–NASSCOM
- Software Testing – NPTEL
- Introduction to Cybersecurity-Cisco
- Introduction to IoT and Digital Transformation-Cisco
- Deep Learning for Developers – Infosys
- Natural Language Processing (NLP)
- Infosys Computer Vision 101 – Infosys
- Data Science – Infosys
